

Cronwatch

Speak your time. See your day.

Voice-first time tracking. Hold the button, speak naturally — Cronwatch turns it into a structured 15-minute entry on a quiet, calm grid.

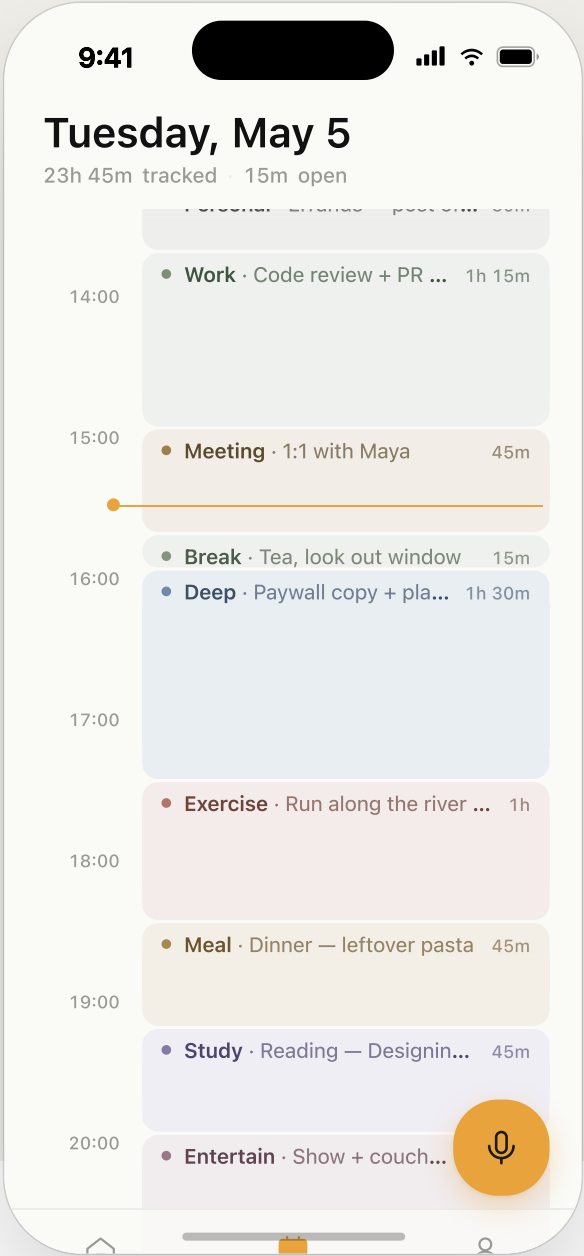

Calm · focused · quietly modern

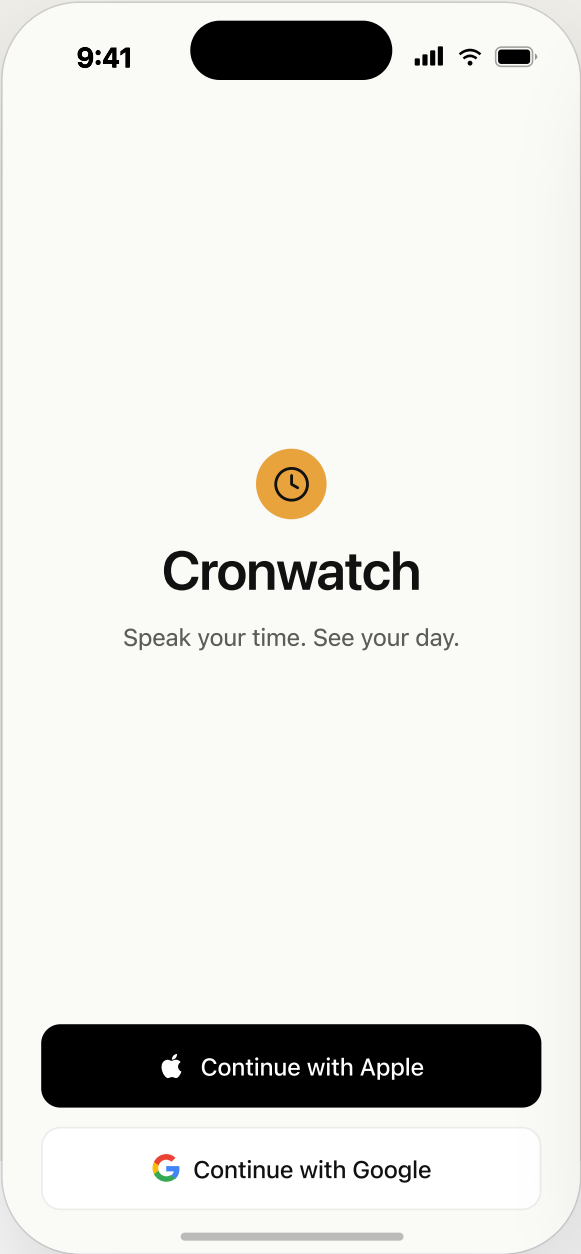

Apple Notes x Linear

SEVEN SCREENS · IN THIS DOCUMENT

- 1. Sign-in
- 2. Overview / Home dashboard
- 3. Today — 15-minute grid
- 4. Capture sheet (FAB)
- 5. Entry detail / edit
- 6. Profile
- 7. Paywall

1 · Sign-in

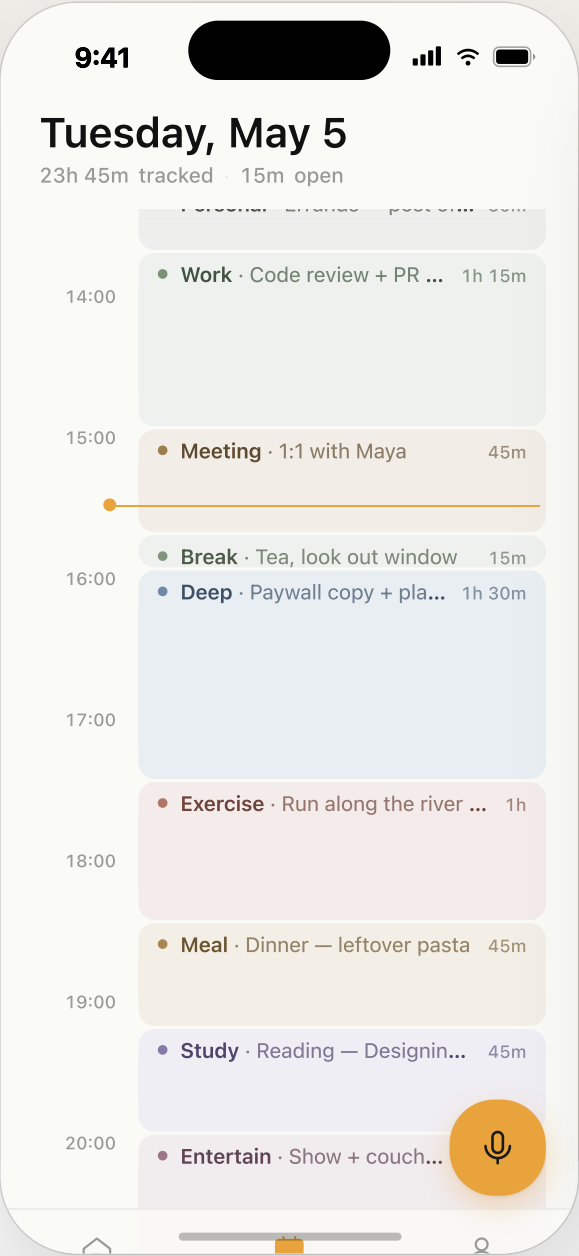

2 · Overview / Home

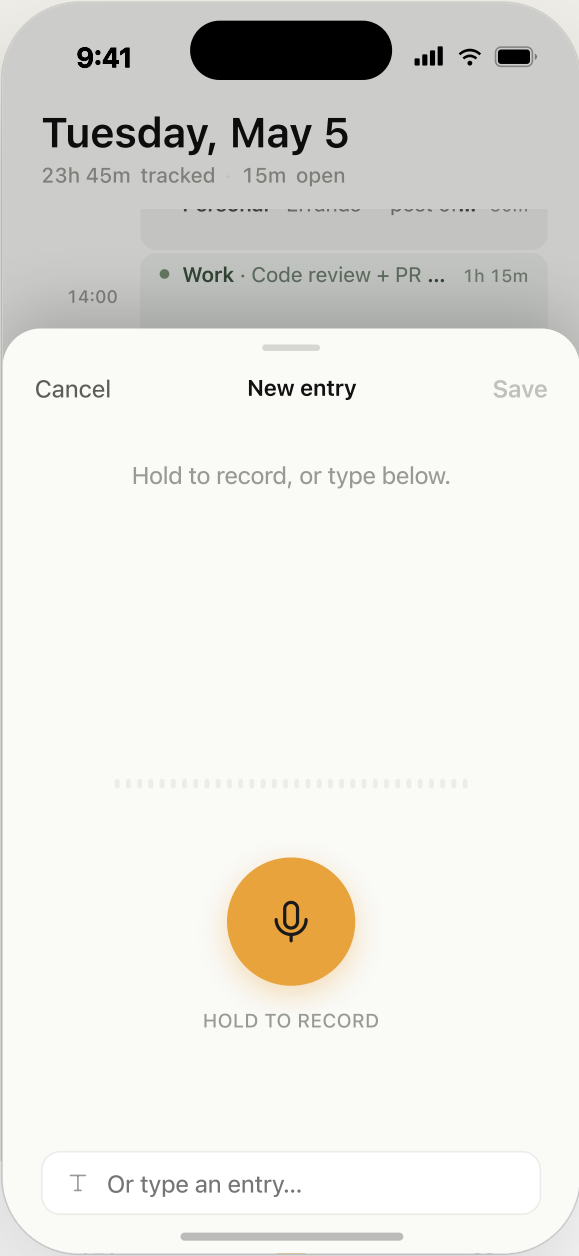

Notes

Sign-in stays quiet — wordmark, tagline, two filled buttons. No hero art.

Overview answers "where does my time go?" with a today donut, week averages, and a 21-day streak strip.

3 · Today — 15-min grid

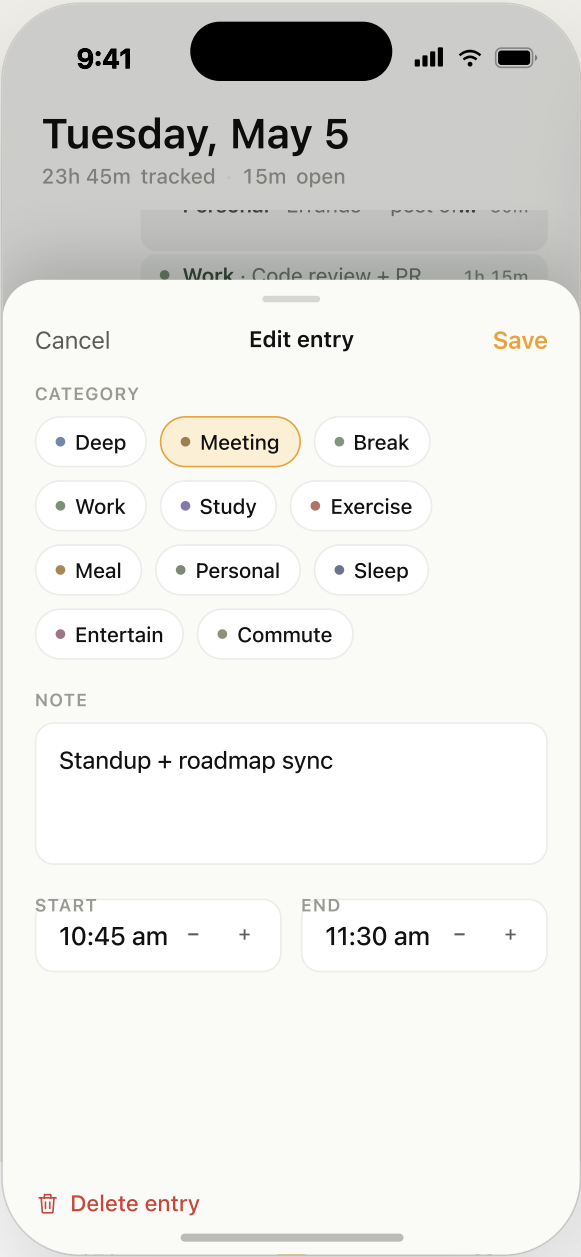

4 · Capture sheet (FAB)

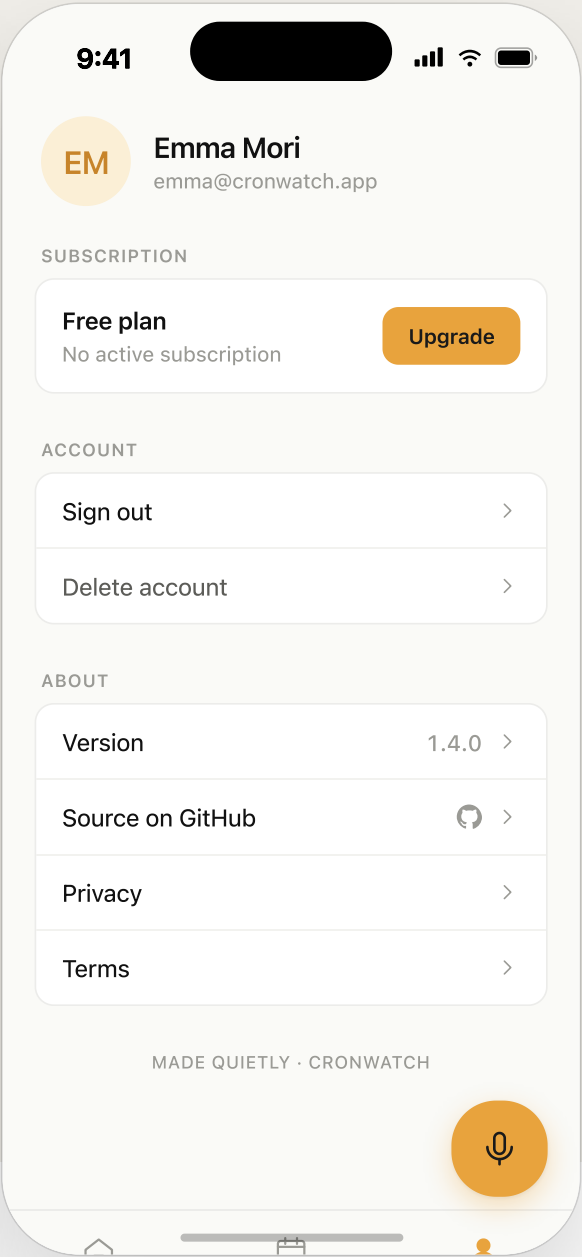

Notes

Today renders 96 quarter-hour rows. Adjacent rows merge into rounded blocks; empty hours show a faint dashed divider; an amber line marks "now."

Capture is the single most important interaction — hold to record, live transcript fills, type fallback at the bottom.

5 · Entry detail / edit

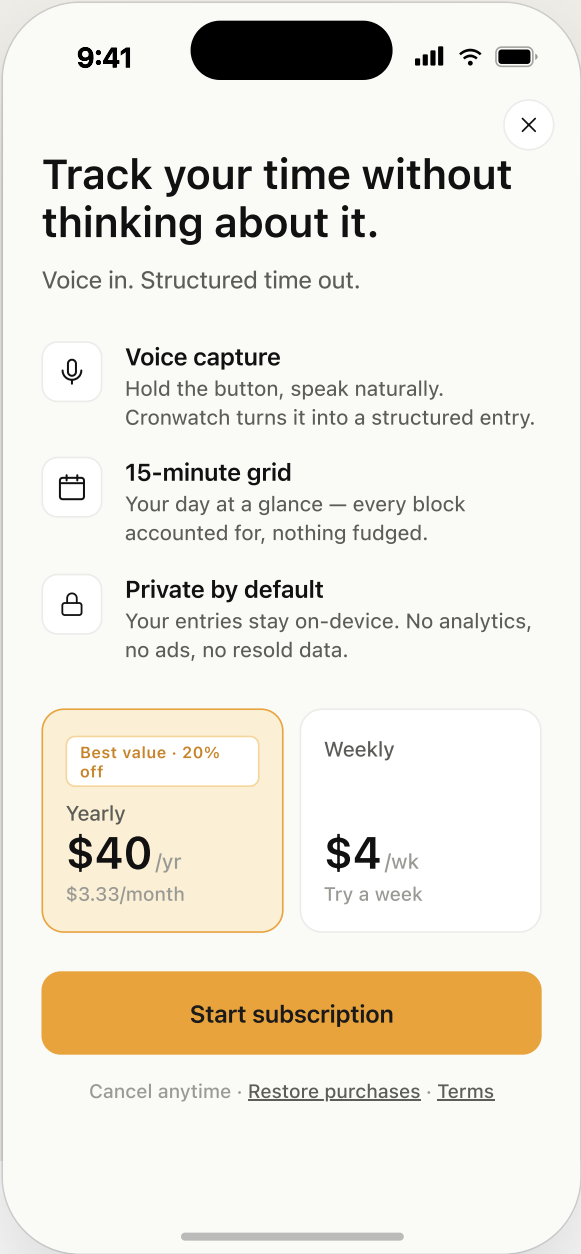

6 · Profile

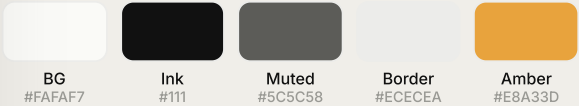

Notes

Edit mirrors Capture's rhythm — chip picker for category (recents first), inline 15-min steppers for times, quiet Delete on the left.

Profile is rarely visited but finished. One subscription card, account rows, version footer.
